From Hon. STEPHEN H. RUDEN, Insurance Commissioner of Massachusetts:

"It is sound to the core, and in a very creditable and flourishing condition. No life company in this country has ever been subjected to a more thorough and severe scrutiny. Its books, accounts, and business; its bonds, stocks and mortgages; its loans, securities and collaterals, its policy liabilities and agency accounts, were gone into with a thoroughness and minute detail which left no room for the slightest concealment or misapprehension. Its mortgages were actually appraised, and, notwithstanding the decline in the value of real estate, were found to afford the most abundant security, giving evidence of remarkable discernment and soundness of judgment in selection from this class of securities."

From Hon. WM. SMYTH, Insurance Superintendent of New York:

"The report you may rely upon as a faithful and complete statement of the truth. The Commissioners went into the most minute details, and every particular was verified. The assets were rather under than over estimated. Their investments are in the most compact form, and are unexceptionably good. As the mortgages were appraised, and I was surprised to find that these securities had suffered no depreciation in value. A masterly judgment seems to have presided over these investments. I feel that I have reason to congratulate the life insurance interest on the strictness of the investigation, because it has demonstrated the integrity and solid strength of this sterling old life corporation."

From Hon. JOHN A. McCALL, Jr., Deputy Superintendent of New York Insurance Department:

"The examination was as close and unsparing in every particular as we could make it, and, as it turned out, was so much the better for the United States Life. Their system of book-keeping is very superior, not only with respect to method, but to accuracy and care. Its most admirable feature is however its constant presentation of the actual condition of the company, which can always be ascertained from the books at a day's notice."

"Its mortality, considering that it is an old company, is remarkably low, and proves that its management has been as discriminating as conservative. It is one-third less than several companies organized since 1856. On the new business done during the last six years, the mortality is light beyond all precedent."

This Society makes a specialty of the yearly renewable life policy, which was originated by SHEPPARD HOMANS, ESQ., (for many years the Actuary of the Mutual Life Insurance Co., of N. Y.)

By insuring under this plan the insured "Pays as he goes—Gets what he buys—and stops or continues as he chooses."

These policies are simple, safe, and just to all. They extend over the whole life. They provide the protection of life insurance as long as it is needed, at actual cost. Like fire insurance policies, the premiums provide for the risk of the current year alone. They furnish insurance from age of twenty-five to forty at an average annual cost of \$12.72 per 1,000; and from age of forty to fifty at an average annual cost of \$15.86 per 1,000.

They call for less outlay for a long series of years than any others. The policy-holder never has at risk more than the actual cost of one year's insurance.

By these policies all the dangers and defects of the old plans are avoided, and life insurance is made acceptable by its simplicity, safety and economy.

HOLBROOK'S STEAM PRINTERY, 11 MECHANIC STREET.

MAPS OF THE CITY AT 11 MECHANIC ST.

P R E F A C E .

Aside from Directory matters, we have but little to communicate which is unknown to our citizens. There has been no especial change in the city during the past year. Economy having been the order of the day, improvements, like business, have been somewhat at a standstill. The city has not enlarged its boundaries, nor has its population materially increased. As in all manufacturing cities, when there is but little business, operatives migrate.

Again we must recur to the difference in dates of moving. Many vacant houses are not occupied until May 1st, after our canvass is made. And here is one of the difficulties in the way of recording every name. Many arrive in the city and others remove after the work is in print. To make up for this discrepancy corrections are made until the last name has gone through the press, and an Addenda will be found at the end of the names for corrections, as well as for those arriving too late to be arranged in the body of the work. Some times our canvassers follow loads of furniture a great distance in order to keep pace with the removal.

As for collecting names, the usual trouble exists in taxation, creditors and other uncertainties too numerous to mention. A Directory publisher is required to make amends for all the shortcomings of these people. If a man is ill a physician is summoned, and care is taken to give correct address. When convalescent and he removes his residence he forgets to give notice of removal. The Directory is called upon to supply it. Hence his dread of the Directory.

So likewise with tradesmen and others. In some boarding houses a Directory is referred to when application is made for board, and unless evidence is given of arrival in the city after the work is published they apply in vain. A neighboring firm, when applied to for alms, if the assumed residence is not found in the Directory, the applicant will make a speedy exit. No pains or expense is spared to have the work reliable, and to that end the co operation of citizens is invited.

In the *Appendix*, pp 817 to 923, will be found matters of interest connected with Newark, the Governments of the several surrounding Townships, p 915; the State, p 863; the United States, p 848; the Federal, State and County Courts, p 856, also New York matters, p 922.

The *Business Directory* is added as usual, p 929. The *Advertisements* are paged, exhibiting to strangers the whereabouts and facilities of those in business.

A full and complete *Index* to various matters and branches of business on next page

Holbrook's Map of Newark, with the latest corrections, similar to that accompanying this work, may be found at the book stores, or at the *Directory Office*, No. 11 *Mechanic Street*. *

ELECTION OF PRESIDENT & VICE PRESIDENT OF THE UNITED STATES ELECTORAL COLLEGE

The voters elect in the several States as many persons as there are members of Congress, known as Electors. These Electors meet at the State Capitals upon a fixed day and cast the electoral vote of the State for President and Vice President. Copies of this vote are sent by messenger to the United States Secretary of State and to the President of the United States Senate and are deposited in a vault in the Capitol with the House of Congress (in February following the election). The persons receiving the majority of the electoral vote for the two offices are declared duly elected President and Vice President of the United States for four years from the ensuing 4th of March. In case no party has a majority of the electoral vote, the election is made by the House of Representatives alone, each State casting one vote, which is controlled by a majority of the Electors, and a majority of all the States is necessary to a choice.

Post Money Orders, for sums not exceeding \$50, each order can be obtained at the principal post offices throughout the country. The use of these orders, by persons who desire to make remittances by mail, is far preferable to sending money, even when the letter containing it is registered. By the money order system, *absolute security* against loss is obtained. Money orders are good for one year from the date of issue. In case of their loss, no charge is made for the issue of duplicates. Persons sending money orders should be careful never to send them in a letter which contains the name of the person from whom they are sent. This is necessary in order to guard against loss in case the letter should fall into improper hands; money orders *never* being paid to any person who cannot tell the name of the party to whom they were issued.

As letters are frequently dropped in the letter boxes insufficiently paid, persons who are not certain in regard to weight, rates, etc., would do well to inquire of the Stamp Clerk before mailing them. If sent to the Dead Letter offices they are delayed two or three mails.

THE EARLY GOVERNMENT OF NEW JERSEY.

The government of New Jersey was first established by the proprietors Lord John Berkeley and Sir George Carteret, the parchment constitution bearing the date of February 10, 1664. This government continued until the division into East and West Jersey, 1676. Robert Barclay was appointed Governor of East Jersey by the proprietors for life, in 1682, and immediately by deputy convened an assembly elected by the people, which sat again in 1686, in 1688 and afterwards at irregular intervals. In West Jersey some of the Governors were appointed by the proprietors, and others by the Legislature, the latter body appointing also the other governmental officers.

In 1702, upon the assumption of the government by the Queen of England, a governor of the Province of Nova Cesarea or New Jersey was appointed by the crown, to hold office at the pleasure of the sovereign. The Governor was assisted by twelve counselors, appointed by the crown and occasionally by himself, six from East and six from West Jersey, any five to make a quorum. The General Assembly consisted of two, elected by the inhabitants and householders of the town of Perth Amboy, and ten by the freeholders of East Jersey ; two by the inhabitants and householders of the town of Burlington, and ten by the freeholders of West Jersey. In 1709 an act was passed reciting that the constitution was inconvenient, and enacting that the majority of the voters of the freeholders of

each county worth fifty pounds or owning one hundred acres of land be taken to elect representatives, who should be worth five hundred pounds or possessed of one thousand acres of land. Two were to be elected for Perth Amboy, and two for each of the then five counties of East Jersey, two for each of the towns of Burlington and Salem, and two for each of the then four counties of West Jersey. Hunterdon county, though established in 1714, continued to send representatives in conjunction with Burlington till 1727, when it was authorized to send two, and Salem town was deprived of its separate representation. Cumberland county was set off from Salem in 1747, but continued to elect representatives as before until 1768, when two additional members were added from Morris county, two from Cumberland, and two from Sussex.

In 1725 the first formal polls were opened, and a clerk was appointed to take down each voter's name, the Sheriff being ordered to keep the poll open from day to day till all had entered their names. One polling place alone was in each county, and in 1789, when East and West Jersey contended as to whether the temporary seat of Government should be at Philadelphia or New York, the polls were kept open three or four weeks. Voting by ballot was first introduced in 1779, was discontinued during the war, restored in several counties in 1783, required by law in 1790, but was not universal till 1797. There were twenty two assemblies from the surrender to the Revolution, some continuing longer than one year, and one from 1761 to 1769, eight years. The assemblies sometimes met five or six times within a year, and once never convened for 10 years.

In 1774 the assembly called upon Governor Franklin to convene the Legislature for the purpose of appointing delegates to a general congress of the colonies to meet in Philadelphia. On his refusing to do so, a meeting of the people of Essex county was held at Newark in June, when notice was sent to the other counties to send delegates to a general committee to meet at New Brunswick in July. This general committee did meet, and sent five delegates to the General Congress. In the next meeting of the assembly the Governor strongly condemned the congress, but the Assembly elected five delegates notwithstanding to attend at the next meeting of the congress. A Provisional Congress of New Jersey also met in Trenton May 23, 1775, and proceeded to aid the Revolution.

On the 12th of August, 1775, the Provincial Congress enacted that all inhabitants worth fifty pounds in real or personal estate should meet at their county court house on the 21st of September, and choose any number not exceeding five, to represent them in the Provincial Congress to be held at Trenton, October 3rd ensuing. The regular assembly met in November of the same year for the last time, but did not attempt to interfere with the Provincial Congress, and being prorogued by the Governor till January 3d. failed to appear on that day. Governor Franklin then ordered them to appear in the name of the King, but the Provincial Congress vetoed that measure, and in return, arrested the Governor and sent him a prisoner to Connecticut.

For "Contents" of this Work, see p. 4.

On June 18th, 1776, the Provincial Congress ratified the Declaration of Independence, and the next day adopted the name of the "Convention of the State of New Jersey." The new Legislature met at Princeton on August 27th following, and continued in session till the 8th day of October, choosing in joint meeting, William Livingston, Governor.

1. On the breaking out of a fire, notice should be immediately communicated to the nearest alarm box, keys of which are always in the hands of the police and responsible persons in the vicinity of boxes

2. Key holders, upon the discovery or positive information of a fire, will unlock box, pull down the slide or hook once *and let go quick*. This gives the desired alarm all over the city, repeating itself four times.

3. Never signal for a fire seen at a distance; never touch the hook except to give the alarm of fire, be sure the box is locked before leaving it, give an alarm for no cause other than an actual fire, *do not give an alarm for a chimney*.

4. Owners and occupants of buildings are requested to inform themselves of the location of signal boxes near their property, also where the keys are kept. Be sure the alarm is properly given; one single stroke of the house gong is not given for an alarm of fire.

5. Second alarm for the same fire can only be given by the Chief Engineer, or one of his assistants.

6. Alarms will be sounded on the alarm bells thus For Box Thirty-two, three strokes—1—1—1, and a pause, then two strokes—1—1, a longer pause and repeating. Alarms for other numbers are given in like manner.
